Atos ranked as European Leader in three quadrants by ISG's Provider Lens mainframes – services and solutions

Recognition highlights Atos' strengths across mainframe consulting, managed services and application modernization in Europe

Paris, France – November 5, 2026 – Atos, a global leader of AI-powered digital transformation, today announces that it has been positioned a Leader in ISG's Provider Lens™ Mainframes – Services and Solutions, Europe, for the **fifth year in a row**. In 2026, Atos was named a Leader in **three quadrants: Mainframe Technology Consulting, Mainframe as a Service, and Application Modernization Services**.

In **Mainframe Technology Consulting**, ISG highlights Atos' credibility in regulated and sovereignty-sensitive environments, its outcome-driven advisory approach and the continuity it provides from consulting through modernization and operations. The report notes that this integrated model helps reduce handover risks and supports complex, multi-year transformation programs, setting a sequenced route that balances continuity with change rather than forcing a single destination.

In **Mainframe as a Service**, Atos is recognized for its sovereign, hub-based delivery model in Europe. According to ISG, Atos combines regional data residency options with security, resilience, integrated disaster recovery and AI-assisted operational optimization for mission-critical workloads.

In **Application Modernization Services**, ISG recognizes Atos' controlled and incremental approach through its Digital Transformation Engineer (DTE) platform, supported by automation across discovery, reverse engineering, business-rule extraction, refactoring and testing. The report also highlights Atos' ability to support multiple modernization paths while preserving the stability of critical workloads.

> **Oliver Nickels, lead author of the study and principal analyst at ISG**, said: *"Atos demonstrates strong credibility in mainframe technology consulting for regulated environments in Europe, combining sovereignty-aware advisory with execution continuity across modernization and operations."*
>
> **Michael Kollar, Atos Group digital sovereignty leader and head of Cloud & Modern Infrastructure and Digital Workplace**, said: *"We are extremely proud that ISG has again named Atos a Leader in all mainframe services quadrants in Europe. This is a fantastic recognition of our teams and the trust our clients place in us every day. Our clients run some of Europe's most critical mainframe systems, and we partner with them to tailor their unique journey first with advice, through optimization, application modernization, to running their operations. With*

Atos sovereign agentic studios, they stay firmly in control of their data, their pace and their future."

Atos modern mainframe helps organizations run, consume, optimize and modernize their core platforms. The portfolio spans mainframe operations, mainframe as a service delivered from European hubs, cost and capacity optimization, and incremental application modernization, delivered worldwide as part of the Atos Cloud and Modern Infrastructure portfolio.
